# Daniel Chan

Data Analyst at DLA Piper  
Brooklyn, New York, United States

## Experience

### DLA Piper

#### Data Analyst

November 2022 - Present (2 years 9 months)

New York, United States

Leveraged the Pandas data manipulation library in Python to transform and extract useful

information from a variety of legal documents.

Performed research and worked with legal AI tools such as CoCounsel to develop solutions and

deepen the firm's understanding of large language models.

Created new Tableau dashboard products and updated existing Tableau dashboards to adapt to

new clients and evolving client needs.

### Tata Consultancy Services

#### Information Technology Analyst

February 2020 - November 2022 (2 years 10 months)

Wilmington, Delaware

Generated and updated reports and dashboards with Power BI using a variety of data sources, including Excel, SharePoint, and SAP HANA and BW.

Created process for migrating Power BI reports and dataflows to new data sources and workspaces in Power BI Service.

Updated reports from local to on-premise online data sources and optimized queries to reduce refresh times.

### Insight Data Science

#### Data Engineering Fellow

June 2019 - August 2019 (3 months)

Greater New York City Area

Participated in an intensive 7-week data engineering training session.

Built a web scraping data pipeline in 3 weeks with no prior knowledge of data engineering.

### Guidepost Solutions

Information Technology Intern

July 2017 - August 2017 (2 months)

United States

Assisted in implementation of IT projects

Provided technical assistance in various company projects

---

## Education
